**20a. How does the Committee accomplish its purpose?**

Section 402(b)(3) of the Public Health Service Act states that ...the Director, NIH...shall assure that research at...the National Institutes of Health is subject to review in accordance with section 492. Section 492(b) states that the Director of NIH shall establish procedures for periodic technical and scientific peer review of research at the National Institutes of Health. This Board assesses the quality of the Institute intramural research programs and evaluates the productivity and performance of staff scientists and necessary functions for the operation of a highly effective intramural research program. The Board is composed of scientific and technical experts. The Board continues to provide indispensable evaluation and advisory functions in the science management of the intramural research programs. Besides the formal meetings for peer review of each laboratory, the chairman and individual Board members are frequently consulted for advice on staff appointments and program development. The actions of the laboratories reviewed are in keeping with the recommendations of the Board. The Board provides the National Advisory Allergy and Infectious Diseases Council with a review and description of its activities.

**20b. How does the Committee balance its membership?**

The committee is composed of up to 15 members who of are authorities knowledgeable in the fields of biochemistry, microbiology, immunology, and vaccine research as it relates to allergy and infectious diseases. Members work in universities and other organizations across the United States.

**20c. How frequent and relevant are the Committee Meetings?**

The committee meets approximately once a year, but did not meet during this reporting period.

**20d. Why can't the advice or information this committee provides be obtained elsewhere?**

This Board is composed entirely of recognized biomedical and/or behavioral research authorities from outside the NIH in order to secure unbiased and objective evaluation of intramural research programs. Their recommendations are invaluable because the complex nature of research in each laboratory requires a unique balance and breadth of

expertise not available on the NIH staff or from other established resources.

## **20e. Why is it necessary to close and/or partially closed committee meetings?**

The Vaccine Research Center Board of Scientific Counselors, NIAID, closes meetings for the review, discussion, and evaluation of individual programs and projects conducted by the Institute, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Section 552b(c)(6) of the Government in the Sunshine Act permits the closing of meetings where discussion could reveal personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

## **21. Remarks**

Committee Function: Other - Scientific and Technical Peer Review. Reports: This committee did not produce any public reports. URL: This committee does not have a website. The DFO and Decision Maker are the same person, Director of the Vaccine Research Center, NIAID. Limited resources and the strict confidentiality of the work of this Board make this a necessity. Ms. Nina Bhardwaj was listed as a member on the 2017 ACR Report. She withdrew from the committee on April 26, 2018.

## **Designated Federal Officer**

John Mascola Director, Vaccine Research Center

## Narrative Description

The goal of NIH research is to acquire new knowledge to help prevent, detect, diagnose, and treat disease and disability, from the rarest genetic disorder to the common cold. The NIH mission is to uncover new knowledge that will lead to better health for everyone. NIH works toward that mission by conducting research in its own laboratories. Section 402(b)(3) of the Public Health Service Act states that the Director, NIH . . . shall assure that research at . . . the National Institutes of Health is subject to review in accordance with section 492. Section 492(b) states that the Director of NIH shall establish procedures for periodic technical and scientific peer review of research at the National Institutes of Health. This Board assesses the quality of the Institute intramural research programs and evaluates the productivity and performance of staff scientists, necessary functions for the operation of a highly effective intramural research program.

### **Cost Savings Comments**

NIH supported basic and clinical research accomplishments often take many years to unfold into new diagnostic tests and new ways to treat and prevent diseases.

**What is the approximate Number of recommendations produced by this committee for the life of the committee?**

30

### **Number of Recommendations Comments**

Reviews of laboratories in the Vaccine Research Center

**What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?**

0%

### **% of Recommendations Fully Implemented Comments**

Information on the research funded by NIH is available through the RePORT (Research Portfolio Online Reporting Tool) website. RePORT provides access to reports, data, and analyses of NIH research activities that advance the mission of the NIH, including information on NIH expenditures, strategic plans, reports on NIH funding, and reports on the organization and people involved in NIH research and research training. The RePORT website is located at <http://report.nih.gov>.
